### SAMPLING AND QUALITY ANALYSIS RESULTS:

The pre-sampling was performed according to the FOSFA rules as pre-shipment. A composite sample of the total consignment was proportionally mixed and submitted for analysis in FOSFA accredited reputable and independent laboratories. The following results were obtained:

Parameter	Method	Result*	LOQ
Total aflatoxins (B1, B2, G1, G2), ppb (µg/kg)	ISO 16050 (HPLC method)	<1*	1 ppb
Aflatoxin B1, ppb (µg/kg)	ISO 16050 (HPLC method)	<1*	1 ppb

\*No analyte at a content above the limit of Quantification was detected

LOQ (Limit of quantification) - is the lowest amount or concentration of analyte in a sample, which can be reliably quantified with an acceptable level of precision and accuracy.

The results of these analyses are in conformity with the above-mentioned quality / condition specifications.

The results of inspection are valid for the time and place of inspection only.
