Under the provisions of 3a. and 3b. above in the event that a cargo was less than 60% of volume of the tank, such cargo to be recorded but is not to be considered a qualifying previous cargo. Such cargo not to be a product on the FOSFA List of Banned immediate Cargoes or to be a product on the FOSFA List of Acceptable Previous Cargoes; whichever list to apply, dictated by the sales contract.

- We sighted ship's log which confirmed the above information as to the previous cargoes and their respective volume in the tank.
- We were informed by ship's \*Captain/Chief Officer that the tank had been cleaned after the last cargo by using the following cleaning procedure:

- BW WITH SW AMB TEMP FOR 1 HOUR;
- BW WITH S.W (60 C) FOR 1,5 HOUR;
- RINSE WITH AMB. TEMP FW FOR 20 MIN;
- VENT, MOP, DRY ;

- Tank was examined internally for cleanliness and as far as could be seen was found to be clean and dry and free from harmful material and, in our opinion, in this respect based on our visual inspection and at the time of our inspection, was in a fit state to receive a cargo of CRUDE SUNFLOWER OIL

- From our inspection we found the tank construction was:
  - \*a Stainless steel.
  - \*b ~~Mild steel coated and as far as could be seen the coating appeared to be in sound condition with minimal mild steel exposure, without loose scale or closed blisters.~~
  - \*c ~~Mild steel and as far as could be seen appeared to be in sound condition without loose scale.~~

- Ship's cargo pumps and fixed pipelines were inspected as far as possible in-situ and based on our visual inspection found to be clean and dry with no significant odour.

- We were informed by the ship's C/O that the ~~tank coils~~ and/or heat exchangers were tested on 20.03.2024 (date) by an application of live steam/~~hot water~~ to not less than 6 kPa bar for a period of 30 minutes and were found tight.

- As far as could be seen from our visual inspection, the hatch covers and jointing appeared to be in sound condition, the seals and packing did not appear to contain copper or copper alloy and there was no copper or copper alloy in the pipelines, pumping system or tank internal fittings where they were in contact with cargo.
