

A large circular image of an oil pumpjack (jackal) in silhouette against a vibrant sunset sky with orange and pink clouds. The sun is low on the horizon, creating a bright glow. The pumpjack's long arm and counterweight are prominent. The entire scene is framed within a teal circular cutout on a teal background.

**Our Company CISS Group
(Commodities International
Survey Services) –
this is a team of professionals
with experience of doing
business in major international
survey companies more than
10 years.**

ABOUT COMPANY

We have teamed up our forces, experience and knowledge in order to offer only the best practice and business solutions in the field of independent inspections for active commodities traders (crude oil, iron ore, bauxites, grains) and others players all over the world.

Operational excellence and high standards of CISS GROUP allow our partners feel protected twenty-four-hour a day.

It's Shipping & Survey

A large offshore oil rig is illuminated at night, set against a dark blue sky with some clouds. The rig's complex structure of steel beams, ladders, and platforms is lit up with warm yellow lights, creating a stark contrast with the dark sea and sky. The rig is positioned in the middle ground, with the ocean extending to the horizon.

SAFETY

The oil and gas inspection industry operates according to stringent standards that primarily strive to keep equipment running efficiently while maintaining workplace safety.

Conforming to such standards is challenging because oil and gas operations involve drilling (both on land and offshore), reservoir engineering, well servicing, production services, refining and transportation of petroleum products, and many other operations.

Not only is it challenging to conform to industry standards, but it is expensive to maintain a safe workplace and to protect workers from harm. It is necessary to equip workers with protective apparel; to continually train them on practicing safety procedures; and to keep them up to date on practicing improved equipment inspection techniques.

It's Shipping & Survey

OIL & PETROCHEMICALS services include:

- Inspection, sampling and testing of crude oil, petroleum products, LPG, petrochemicals and chemical gases
- Bulk oil cargo measurement
- Blending
- Additivisation
- Laboratory tests
- Ship to ship inspections
- Tank cleanliness inspections
- On/off hire surveys
- Bunker inspections
- Tank calibration
- Loss control

It's Shipping & Survey

**PRE-SHIPMENT
INSPECTION
services include:**

- Loading, discharge inspections
- Evaluation of manufacturer's production capability
- Cargo sampling for quality parameters testing

It's Shipping & Survey

CISS GROUP petroleum (crude oil) and petroleum-products bulk cargo inspection services help ensure quality and quantity when trading and transporting high value petroleum cargo movements. CISS GROUP expertise reduces financial risks to trading parties.

**CRUDE
OIL**

It's Shipping & Survey

A photograph of an industrial facility at dusk or night. In the foreground, a large, spherical crude oil storage tank is illuminated from below, showing its metallic surface and various pipes and ladders. In the background, several tall distillation columns and other industrial structures are visible, some with lights on. The sky is a mix of purple and blue.

CRUDE OIL

Bulk petroleum and refined products inventory and custody transfer inspection:

- Tank Gauging
- Atmospheric Monitoring
- Product Sampling to Industry Standards
- Tank Cleanliness Inspection
- Tank Wall Wash
- Tanker Lightering
- Auto-Sampling
- Investigation of Cargo Discrepancies
- Sampling, Sample Transport
- Sample Quality Laboratory Testing and Retain

CISS GROUP regularly conducts inspections of petroleum distribution systems and analyzes samples of petroleum products. Gasoline, alternative fuels (E85, biodiesel, ethanol, etc.), kerosene, diesel, fuel oil, antifreeze products and brake fluid products are routinely tested and must meet strict standards.

It's Shipping & Survey

As bunker fuel is often the largest contributor to the operational costs of a ship, it is critical that the fuel purchaser ensures the correct amount of fuel is received, or has sufficient information to substantiate their claim in the event of any dispute.

**BUNKER
SURVEY**

It's Shipping & Survey

BUNKER SURVEY

As bunkering operations often take place some distance from the fuel purchaser's office, it is in their interest to engage a CISS Group's surveyor to verify the quantity delivered and oversee fuel sampling for laboratory analysis.

The survey is carried out to measure and ascertain the quantity of Bunker on board at the specific time. This survey is produced the report that states the amount of bunker, usually **Fuel Oil (HFO)** and **Diesel Oil (LFO/DO)**, and sometimes **Lubricating Oil (LO)** is included.

CISS Group know how to conduct the Bunker Survey on the ships berthed or at anchorage place (so-called STS operation).

Survey Tools required for Bunker Surveyor

- Notes Book and Sounding Tape,
- Thermometer,
- Density Meter for Oil (0.750 -1.000),
- Oil and Water Paste,
- Petroleum ASTM Table 54B (for Product Oil) and Table 56,
- Goggles and Glove,
- Flashlight,
- Bottle or Can for Sampling (if required taken samples).

It's Shipping & Survey

CISS GROUP laboratory is equipped with the most-up-date and state-of-the-art instruments which allow the lab personnel to perform testing with greatest speed and utmost accuracy. The laboratory covers a comprehensive range of tests for every main product so as to provide an excellent service with full test scope.

**Petroleum laboratory
can offer you all
following analyses
(based on ISO 8217:2017
specifications):**

Density @15°C, Viscosity @50°C, Water, Micro Carbon Residue, Sulfur, Total Sediment Potential, Ash, Vanadium, Sodium, Iron, Nickel, Calcium, Magnesium, Zinc, Phosphorus, Potassium, Pour Point, Flash Point, Aluminium + Silicon, CCAI (Ignition Quality), Acid Number, Net Specific Energy, Cetane Index, Kinematic Viscosity @40°C, Hydrogen Sulphide, Oxidation Stability, Lubricity (WSD 1.4) @60°C, Micro Carbon Residue on 10% (v/v) Distillation Bottom

It's Shipping & Survey

Aviation fuel is a specialized type of petroleum-based fuel used to power aircraft. It is generally of a higher quality than fuels used in less critical applications, such as heating or road transport, and often contains additives to reduce the risk of icing or explosion due to high temperature, among other properties. The most important test for Air Jet – Freezing Point.

It's Shipping & Survey

Fueling and service stations must be checked regularly to ensure safety standards are being met.

Fuel Quality Monitoring:

CISS GROUP provides field fuel sampling and laboratory testing services to support regulatory and consumer protection programs.

Petrol Pump Calibration for Metrological Control:

CISS GROUP verifies the accuracy of measured fuel quantity delivered matches the fuel pump reading, helping assure consumer protection.

Petrol station fuels samples and tested include the full range of fuels and their components and additives, including gasoils, gasoline, diesel, fuel oils, biofuels, DEF (AdBlue), CNG, LPG and other fuels.
